About the Conference

DRIIV (Delhi Research Implementation and Innovation) is the umbrella body for the Delhi NCR Science & Technology (S&T) cluster, which is a formal structure for S&T organizations in Delhi NCR and neighbouring regions to have better synergy while retaining their autonomy. It is supported by the Office of the Principal Scientific Adviser to the Government of India on the recommendation of the Prime Minister's Science, Technology and Innovation Advisory Council (PM-STIAC) to create an Atmanirbhar Bharat through S&T. DRIIV is creating strong linkages between existing academic institutions, national & state research laboratories, and other stakeholders like relevant ministries, industry partners, start-ups, MSMEs, state governments, philanthropic foundations, and international organizations, to take innovations from lab-to-market. DRIIV is delivering on National Missions, aligned with the UNSDGs, in key thematic areas such as Waste to wealth, Water Security, Air Pollution Mitigation, Sustainable Energy, Green Mobility, Deep Tech (AI/ML), Healthcare, Effective Education.

This is the first edition of DRIIV's annual flagship conference - **RESOLVE** - which showcases DRIIV's initiatives in sustainability and breakthrough tech innovations so far and brings together members of the ecosystem who are instrumental in delivering on DRIIV's objectives.
